DEVELOPMENT

Provided by the Student-Postdoc Advisory Committee and the Office of Scientific Career Development.
NEW TO FRED HUCH

We provide resources to make our trainees' transition to Fred Hutch as smooth as possible:

- A SURVIVAL GUIDE serves as a summary of polices, programs, and resources
- A WEEKLY NEWSLETTER disseminates professional development opportunities, funding opportunities, and job ads
- An INTERNATIONAL AMBASSADOR PROGRAM pairs incoming international trainees with current trainees to ease transition

HOUSING

Fred Hutch is located along South Lake Union, very close to downtown Seattle. Our campus is accessible both by foot and bus from a number of neighborhoods. We encourage trainees to apply to affordable housing programs to secure a fixed rental rate based on salary. See our website for more information.

CAREER SERVICES

IVORY TOWER QUEST

Ivory Tower Quest supports those who are gearing up to apply for faculty positions. This includes building strong application packets, the interview process, and negotiating a start-up package. We also provide a venue to give practice talks with faculty in attendance.

EXPLORATION PROGRAM FOR INDUSTRY CAREERS (EPIC)

EPIC provides education and networking opportunities to those curious about careers in Industry. In addition to career workshops and events at Fred Hutch, EPIC features site visits to local biotech companies, providing an in-depth look at industry careers. The program also gives participants opportunities to make connections in Industry, which can help in setting up collaborations and in current and future job searches.

CAREER COUNSELING

We offer the opportunity to receive direct career counseling from our Director of the Office of Scientific Career Development, Dr. Karen Peterson. She has over 20 years of experience advising trainees and students on their career trajectory, as well as being a resource throughout the application process.
